

Take The Control in Aurora Plasma!

Take The Control in Aurora Plasma!

Lantek Inside

- With Lantek Inside feature added to Aurora Plasma machines, you can make changes to userprepared programs, you can import dxf/dwg drawings or use the macro libraries. The program lets the user make a program directly from controller without computer need.

Advantages

- The user can quickly modify part programs without the need a CAD / CAM computer.
- Possible to make a new nesting from controller.
- Possible to add functions as skeleton cutting, mikrojoints..
- Simple and useful interface.
