### Mawslattar

## Control Under Your Hand...

### Durma Cloud

Makes the machines accessible and viewable. The machine allows storage and reuse of data.

Cost calculations

Consumption calculations

Operation, stopping time and productivity calculations

The instant status of your machine,

Remote monitoring and control without going to the machine.

Receive reports of discontinued parts

Retrospectively, receive reports based on date range

You can review error messages and error reasons

Today Tomorrow Forever..

# June 2017 NGWSIGHER

Cloud application allows monitoring of machine status, working hours, interrupted programs and alarms through internet.

This data is stored on the server for a long time and the user can review or receive reports at any time.

To access the cloud, just click the following

URL with any browser:

### http://www.durmacloud.com

In order to activate this function on the new commissioning machine, login must be done with license information to the cloud server for one time only. Thus, the machine which is matched with the activation code on license at the factory can also be matched with the user.

Once you have entered

### www.durmacloud.com

login should be done using the activation code and password on the license certificate.
