

Now, The Dynamic Features Of The DURMA HD-TC Are Higher!
Now, The Dynamic Features Of The DURMA HD-TC Are Higher!

Cutting Times Decreased By 25% On Average!

The acceleration and jerk values are increased with the optimizations in the hydraulic chuck and centering chuck of the machine. Especially with the speed and acceleration optimizations in the rotation movements of the chucks;

- Both cutting times and idle movement time are reduced.
- Parts cutting time was reduced by an average of 25%.
- Machine efficiency is improved.
- With time-saving, cutting cost is reduced.
- Our Pipe - Profile Cutting Machines deliver fast, secure and efficient machining 24 hours a day.
