**Staying One Step Ahead From Your Competitors With The DURMA Hydraulic Clamping System...**

## **DURMA Hydraulic Clamping System**

The new hydraulic clamping system produced by DURMA, provides better cost as well as lead time advantages together. System also applicable in customized machine projects. Therefore, it is a system that can meet different demands of customers.

With Durma Hydraulic Clamping System does not deteriorate the bending precision of the molds deformed over time

### **Advantages & Benefits**

- System can be applied to different dimensions and tonnage.
- System provides an average cost advantage of 30% compared to its competitors.
- System can be supplied in 50% less time than its competitors.
- Precise bending and maximum bending accuracy are achieved with the system. Therefore, an average production increase of 4,000 - 5,000 Euro can be achieved in the daily 10 hours of use a press brake during whole year.
