

DURMA

Durma Cloud : Cloud-Based Production Intelligence Platform

2026

Durma Cloud is a cloud-based production monitoring platform that enables real-time machine data tracking and advanced analytics.

Experience Durma Cloud.

Real-Time Performance Monitoring

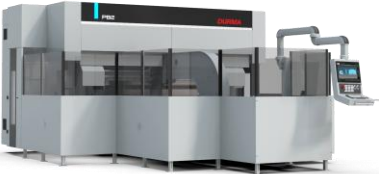

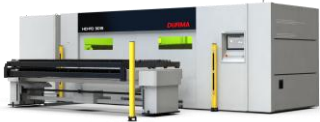

Event Log Management

Operational Status Tracking

Detailed Program Analytics

Monitor Your Machine Performance Anytime, Anywhere.

Seamlessly monitor production from anywhere via web, mobile, and smartwatch connectivity; driving efficiency and delivering full operational visibility.

Simplified access to machine data.

D Mobile's enhanced capabilities bring machine monitoring to your fingertips — delivering real-time data access and smart notifications across mobile and smartwatch* platforms. An intuitive interface ensures fast access and seamless, uninterrupted machine supervision.

*Supports smartwatch integration; however, the smartwatch is not included and must be purchased separately.

One Platform. Endless Visibility.

Whether you are a dealer or an end user, Durma Cloud allows you to seamlessly monitor and manage unlimited machines from a single platform.

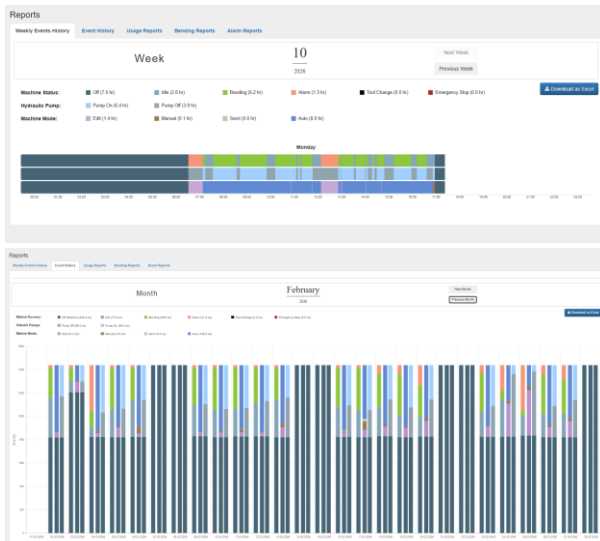

- ✓ Improve operational efficiency,
- ✓ Optimize production processes,
- ✓ Detect potential risks before they impact operations

Stay in control in an ever-changing market environment, transform challenges into opportunities, and maximize the advantages of digital transformation with Durma Cloud.

Durma Cloud License

The redesigned interface of Durma Cloud delivers complete production visibility by allowing real-time and historical performance analysis across press brakes, laser, plasma, punching machines, production lines, and bending centers.

See Clearly.
Control Confidently.
Perform Better.

Connect Your Machines. Drive Profitability.

- ✓ Real-time visibility of machine status,
- ✓ Tracking of operating, idle, alarm, and emergency stop conditions,
- ✓ Daily, weekly, and monthly production analytics,
- ✓ Excel-based data export capabilities,
- ✓ Machine utilization analysis,
- ✓ Historical access to processed part programs,
- ✓ Alarm analytics to minimize production downtime,
- ✓ Automated report delivery to predefined email recipients,
- ✓ Transfer part programs directly to machines via the Cloud*,
- ✓ Monitor the production status of transferred parts in real time*,
- ✓ Remotely monitor operations continuously through IP camera integration*/**.

Your machine comes with
a complimentary one year **Durma Cloud*** subscription.

The subscription period starts once the **Durma Cloud** account is activated. **Durma Cloud** subscriptions are machine-based** rather than user-based.

*All machines supporting the **Durma Cloud** license (Laser, Profile Cutting, Panel Bender, Punch, and Press Brake machines equipped with the Durma SKY control unit) will automatically include a one-year **Durma Cloud** license. For press brake machines equipped with different control systems (such as Delem, ESA, etc.), an additional hardware fee will apply.

A one-year **Durma Cloud subscription is limited to a maximum of two users.

Visit www.durmacloud.com

Sign in using the user credentials included in your license certificate and begin monitoring your machines right away.

Renew Your Subscription Today, and Enhance Your Investment Value.

- ✓ Instantly access and benefit from new features,
- ✓ Ensure continuous data security and protection,
- ✓ Connect your machine for seamless technical support,
- ✓ Turn challenges into value-added solutions through remote diagnostics

More than software.

An intelligent platform powering continuous production.

The New **Durma Cloud** Subscription Unlimited Access. On Your Terms.

Users may extend their Durma Cloud subscription at any time by purchasing additional licenses, without waiting for the current license to expire.

The duration of the extension license will automatically be added to the end date of the existing active subscription.

Example:

Current license expiration date: 06.02.2027

Purchased extension license: 3 years

Updated license expiration date: 06.02.2030

IMPORTANT NOTICE:

Access to machine data will be unavailable for machines with an expired Durma Cloud subscription until the license is extended.

Annual License Fees

Single Machine Package

Net €/Year	First Machine	Second Machine	Additional Machines (3+)
Press Brake*	€ 600	€ 540	€ 490
Laser Cutting	€ 800	€ 720	€ 650
Panel Bender	€ 1.500	€ 1.350	€ 1.200

Family Package

€/Year	Price
Family Package 3 Machines	€ 2.500
Family Package 5 Machines	€ 3.500
Family Package 10 Machines	€ 5.000

*All machines supporting the Durma Cloud license (Laser, Profile Cutting, Panel Bender, Punch, and Press Brake machines equipped with the Durma SKY control unit) will automatically include a one-year Durma Cloud license. For press brake machines equipped with different control systems (such as Delem, ESA, etc.), an additional hardware fee will apply.

Existing **Durma Cloud** Subscribers

As of June 10, 2026, the service model for “Durma Cloud” and “Durma Cloud Pro” will transition from a “Lifetime Usage” structure to an “Annual Subscription” model available exclusively through a Durma Cloud license.

Effective June 10, 2026, Durma Cloud and Durma Cloud Pro licenses will be merged and offered under a single license structure named “Durma Cloud.” Customers purchasing the “Durma Cloud” license from this date onward will also benefit from the File Transfer feature as part of the package. However, the Camera option and complimentary Smartwatch previously included within the Durma Cloud Pro scope will be discontinued.

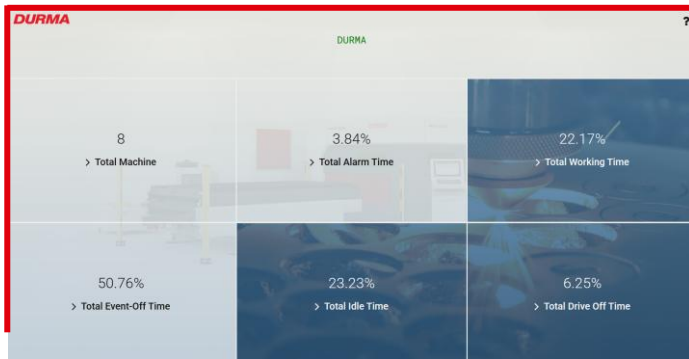

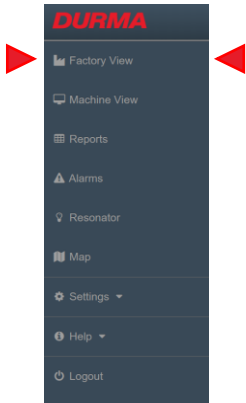

Customers who purchased “Durma Cloud” or “Durma Cloud Pro” licenses on or before June 10, 2026, will continue to retain their lifetime usage rights.

NEW

**Press Brake Series
Now in the Cloud**

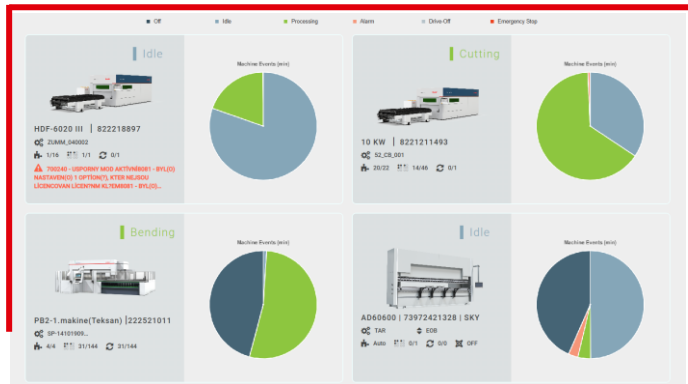

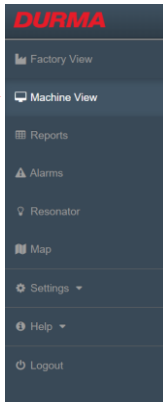

**One Platform
Total Control**

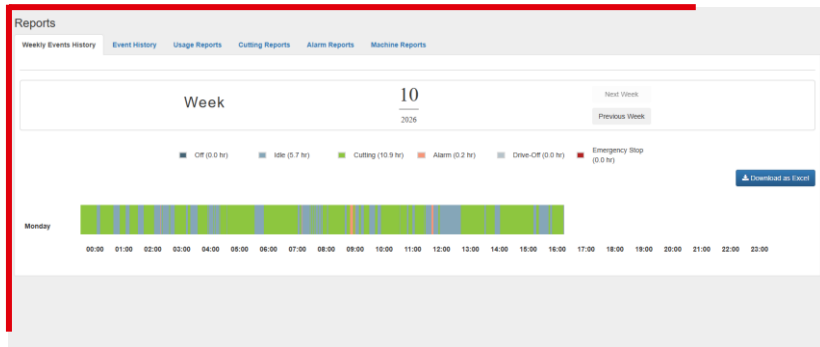

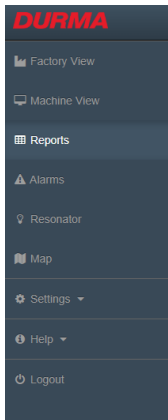

▲ Control every press brake in your production line anytime, from anywhere.

- Monitor machine operations in real time,
- Accelerate performance evaluation,
- Improve operational efficiency,
- Easily analyze the causes of unplanned downtime

The Solution in Your Hands. The ideal choice for real-time monitoring.

- Total bending statistics
- Hydraulic pump operating status
- Machine status details (operating, idle, and downtime durations)
- Bending program details
- Alarm information

Monitor machine status, operating modes, hydraulic pump performance, and material usage with flexible weekly or monthly tracking. Export data as files and create customized reports to support deeper production analysis.

Every Bend Under Control. Every Data Point Recorded.

Monitor the used program, material type, thickness, and production date-time ranges in a single comprehensive report.

Manage Alarms. Protect Performance.

Alarm analytics highlight recurring warnings, allowing issues to be addressed early and extending machine lifespan.

Please contact your sales representative for further details and support.
